# INDEX TO VOLUME LIX, 1947

PAGE

Adams, Robert C. and Sidney M. Collegeman; Evaluation of High Temperature Greases ..... 22

Air Conditioning Afloat, by Daniel S. Berres, Ernest A. Redman, and George P. Lively ..... 1

A Marine Gas Turbine Installation (Note) ..... 103

Alternating Current Turbo Electric Ship Propulsion, Recent Developments in (Note) ..... 383

An Apparently Neglected Phase of Naval Research, by James E. Hamilton, Captain, U.S.N. ..... 309

An Unusual Boiler Mishap (Note) ..... 511

Applications, Performance Characteristics and Design Considerations, Gas Turbine, by Dr. J. T. Rettaliata ..... 306

Arctic Operations, Influence of on Future Ship Design, by Captain R. B. Lank, U.S.C.G. ..... 139

Arctic Operations, Influence of on Future Ship Design, by Junius W. Millard, Captain, U.S.N.R. ..... 291

Association Notes ..... 129, 269, [illegible], 546

Atomic Energy and Its Application (Note) ..... 223

Atomic Energy, Industry's Stake in (Note) ..... 376

Ball and Roller Bearing Seals (Note) ..... 516

Bearing Seals, Ball and Roller (Note) ..... 516

Bearings, Roller, in Stern Tubes (Note) ..... 243

Berres, Daniel S., Ernest A. Redman, and George P. Lively; Air Conditioning Afloat ..... 1

Boiler Mishap, An Unusual (Note) ..... 511

Boilers, Naval, A Study of the Cause of Hard Slag Deposits on Firesides of, by Commander L. C. McCloskey, U.S.N.R. ..... 146

"Boilers, Naval, A Study of the Cause of Hard Slag on Firesides of" by Commander L. S. McCloskey, U.S.N.R., Published in May, 1947, Journal. Discussion by Captain Carl J. Lamb, U.S.N.R. ..... 489

Bolt Studs, High Temperature, Threading of, by K. D. Williams ..... 57

Carriers, Light Fleet, Notes on (Note) ..... 534

Chiles, J. H., Jr., and Paul R. Sprowl; Dry Type Distribution Transformers for Shipboard Power and Light ..... 43

Collegeman, Sidney M., and Robert C. Adams, Evaluation of High Temperature Greases ..... 22

Comparison of Electric Ship Propulsion with Other Types of Drive, by J. B. Friauf and N. T. Jucarone ..... 174

PAGE

Considerations Determining the Size and Thickness of Main Steam Piping for Naval Vessels, by R. Michel ... 334
Dehumidification Protects U. S. Navy's Inactive Fleet (Note) ... 247
Design, Ship, Future, Influence of Arctice Operations on, by Junius W. Millard, Captain, U.S.N.R. ... 291
Diesel Drives, Marine, Selection of (Note) ... 318
Distilling Plant Economy (Note) ... 531
Dry Type Distribution Transformers for Shipboard Power and Light, by J. H. Chiles, Jr., and Paul R. Sprowl ... 43
Electric Ship Propulsion, Comparison of with Other Types of Drive, by J. B. Friauf and N. T. Jucarone ... 174
Engineering Lessons and Gains of the Recent Years (Note) ... 261
Evaluation of High Temperature Greases, by Robert C. Adams and Sidney M. Collegeman ... 22
Exaggerated Fire Hazard of Magnesium, by Captain Carl J. Lamb, U.S.N.R. ... 486
Expansion Problem, High Temperature Steam Piping, Future of, by F. A. Scanlan ... 40
Final Report of Board to Investigate Design and Methods of Construction of Welded Vessels (Note) ... 353
Flooding, Extensive, Stability of Ships After, by Charles C. Wright, Jr. 442
Friauf, J. B. and N. T. Jucarone, Comparison of Electric Ship Propulsion with Other Types of Drive ... 174
Fundamentals of Ship Stability (Note) ... 355
Future of High Temperature Steam Piping Expansion Problem, by F. A. Scanlan ... 48
Gas Turbine, A Marine Installation (Note) ... 103
Gas Turbine Performance Characteristics, Design Considerations and Applications, by Dr. J. T. Rettaliata ... 306
Gas Turbines, Problems in Mechanical Design of (Note) ... 539
Gear Design, Lubrication Considerations in (Note) ... 393
German Wartime Technical Developments (Note) ... 77
Greases, High Temperature, Evaluation of, by Robert C. Adams and Sidney M. Collegeman ... 22
Hamilton, James E., Captain, U.S.N., An Apparently Neglected Phase of Naval Research ... 300
Hydrogen Peroxide for Propulsive Power (Note) ... 97
Inactive Fleet, U. S. Navy, Dehumidification Protects (Note) ... 247
Industry's Stake in Atomic Energy (Note) ... 376
Influence of Arctic Operations on Future Ship Design, by Captain R. B. Lank, Jr., U.S.C.G. ... 139

PAGE

Influence of Arctic Operations on Future Ship Design, by Junius W. Millard, Captain, U.S.N.R. 291
Jucarone, N. T. and J. B. Friauf, Comparison of Electric Ship Propulsion with Other Types of Drive 174
Lamb, Carl J., Captain, U.S.N.R., Exaggerated Fire Hazard of Magnesium 486
Discussion of the Paper "A Study of the Cause of Hard Slag on Firesides of Naval Boilers" by Commander L. C. McCloskey, U.S.N.R., published in May, 1947, Journal 489
Lank, R. B., Captain, U.S.C.G., Influence of Arctic Operations on Future Ship Design 139
Lethal Atmospheres Produced by the Growth of Microorganisms in Confined Spaces, by David F Richardson and Oscar I. Milner 165
Lively, George P., Daniel S. Berres and Ernest A. Redman, Air Conditioning Afloat 1
Lubricating Oils, Turbine, Rusting Characteristics of (Note) 254
Lubrication Considerations in Gear Design (Note) 393
McCloskey, L. C., Commander, U.S.N.R., A Study of the Cause of Hard Slag Deposits on Firesides of Naval Boilers 146
Magnesium, Exaggerated Fire Hazard of, by Captain Carl J. Lamb, U.S.N.R. 486
Mare Island's Accurate Method of Propeller Manufacture, by Milton M. Metcalf 33
Marine Engineering, Mechanical Progress in During 1946 (Note) 209
Mechanical Progress in Marine Engineering During 1946 (Note) 209
Metcalf, Milton M., Mare Island's Accurate Method of Propeller Manufacture 33
Michel, R., Considerations Determining the Size and Thicknuess of Main Steam Piping for Naval Vessels 334
Millard, Junius W., Captain, U.S.N.R., Influence of Arctic Operations on Future Ship Design 291
Milner, Oscar I. and David F. Richardson, Lethal Atmospheres Produced by the Growth of Microorganisms in Confined Spaces 165
Navy Explores its Northern Frontiers, by Dr. M. C. Shelesnyak 471
New Type Marine Reduction Gear (Note) 527
Northern Frontiers, The Navy Explores, by Dr. M. C. Shelesnyak 471
Notes on Submarine Design (Note) 238
Nordstrom, Dr. H. F., Propellers with Adjustable Blades 411
Oils, Lubricating, Turbine, Rusting Characteristics of (Note) 254
On the Mathematics of Committees, Boards and Panels (Note) 118
Operation Pluto (Note) 495

PAGE

Performance Characteristics, Design Considerations and Applications, Gas Turbines, by Dr. J. T. Rettaliata ..... 306
Piping, Main Steam, Considerations Determining Size and Thickness for Naval Vessels, by R. Michel ..... 334
Piping, Steam, High Temperature, Future of Expansion Problem, by F. A. Scanlan ..... 48
Problems in Mechanical Design of Gas Turbines (Note) ..... 539
Propeller Manufacture, Mare Island's Accurate Method of, by Milton M. Metcalf ..... 33
Propellers with Adjustable Blades, by Dr. H. F. Nordstrom ..... 411
Propulsion, Ship, Comparison of Electric with Other Types of Drive, by J. H. Friauf and N. T. Jucarone ..... 174
Propulsive Power, Hydrogen Peroxide for (Note) ..... 97
Recent Developments in Alternating Current Turbo Electric Ship Propulsion (Note) ..... 383
Redman, Ernest A., Daniel S. Berres and George P. Lively, Air Conditioning Afloat ..... 1
Reduction Gear, New Type Marine (Note) ..... 527
Refrigeration, Steam Jet, for Marine Purposes (Note) ..... 114
Repairs to Merchant Ships, Some Wartime Examples of (Note) ..... 66
Research, Naval, An Apparently Neglected Phase of, by James E. Hamilton, Captain, U.S.N. ..... 300
Rettaliata, Dr. J. T., Gas Turbine Performance Characteristics, Design Considerations and Applications ..... 306
Richardson, David F. and Oscar I. Milner, Lethal Atmospheres Produced by the Growth of Microorganisms in Confined Spaces ..... 185
Rusting Characteristics of Turbine Lubricating Oils (Note) ..... 254
Scanlan, F. A., Future of High Temperature Steam Piping Expansion Problem ..... 48
Seals, Ball and Roller Bearing (Note) ..... 516
Selection of Marine Diesel Drives (Note) ..... 218
Shafting, Torsional Vibration Stress in (Note) ..... 504
Shelesnyak, Dr. M. C., The Navy Explores Its Northern Frontiers ..... 471
Ship Design, Future, Influence of Arctic Operations on, by Captain R. B. Lank, U.S.C.G. ..... 139
Slag Deposits on Firesides of Naval Boilers, A Study of the Cause of, by Commander L. C. McCloskey, U.S.N.R. ..... 146
Slag Deposits on Firesides of Naval Boilers, A Study of Cause of, by Commander L. C. McCloskey, U.S.N.R., published in May, 1947, Journal, Discussion of, by Captain Carl J. Lamb, U.S.N.R. ..... 480
Some Wartime Examples of Repairs to Merchant Ships (Note) ..... 66

PAGE

Sprowl, Paul R., and J. H. Chiles, Jr., Dry Type Distribution Transformers for Shipboard Power and Light ..... 43
Stability of Ships After Extensive Flooding, by Charles C. Wright, Jr. 442
Stability, Ship, Fundamentals of (Note) ..... 355
Steam Jet Refrigeration for Marine Purposes (Note) ..... 114
Stern Tubes, Roller Bearings in (Note) ..... 343
Study of the Cause of Hard Slag Deposits on Firesides of Naval Boilers, by Commander L. C. McCloskey, U.S.N.R. ..... 146
Submarine Design, Notes on (Note) ..... 238
Technical Developments, German Wartime (Note) ..... 77
Thickness and Size of Main Steam Piping for Naval Vessels, Considerations Determining, by R. Michel ..... 334
Threading of High Temperature Bolt Studs, by K. D. Williams ..... 57
Torsional Vibration Stress in Shafting (Note) ..... 504
Transformers, Distribution, Dry Type, for Shipboard Power and Light, by J. H. Chiles, Jr., and Paul R. Sprowl ..... 43
Turbo Electric Ship Propulsion, Alternating Current, Recent Developments in (Note) ..... 383
Welded Vessels, Final Report of Board to Investigate Design and Methods of Construction of (Note) ..... 353
William, K. D., Threading of High Temperature Bolt Studs ..... 57
Wright, Charles C., Jr., Stability of Ships After Extensive Flooding ..... 442
